Basic information

Category: Health & Fitness

This is a sports and fitness app designed to promote physical and mental well-being. The app provides various features, including workout plans, relaxation techniques, and progress tracking. Users can choose exercises based on their goals, such as improving strength, flexibility, or mindfulness. The design is user-friendly, with a clean and modern interface that offers personalized recommendations based on the user's preferences and fitness level.

Key Features:

1. Personalized Workout Plans: Tailored exercise routines based on user preferences and fitness goals
2. Relaxation Techniques: Guided meditation and breathing exercises for mental well-being.
3. Progress Tracking: Monitor your fitness journey with detailed statistics and milestones.

Target Audience:

The target audience is anyone seeking to improve fitness and well-being, including beginners and busy individuals.

Phase 1

The First Page

*The logo in this page
is representing the
“Emphasis” principle*

The second Page

*The photos in this

the “Regular
Rhythm”
principles

Phase 2

The First Page in figma

Title (Time to meditate):

- Purpose: It presents the main idea of the page, which is to encourage the user to start a meditation session.

Button (Let's get started):

Function: Takes the user to the next step to start meditating.

The second Page in figma

"Read more" button in the Health Score section:
Function: Allows the user to learn more details about the health score and how it was calculated.

"Home":
Function: Takes the user back to the app's main page.

"Metrics" (graph icon):
Function: Takes the user to a section showing detailed health metrics.

"Add" button in the center (plus icon):
Function: Allows the user to add new data, such as steps, calories, or water intake.

The second Page in figma

Back Arrow:
Takes the user to the previous screen.

Large Circle:
Shows the total number of steps taken and the percentage of the daily goal completed.

Graph (Daily, Week, Month):
Displays activity data over a daily, weekly, or monthly timeframe based on the selected view.

Insight Button:
Opens a detailed analysis or insights page about daily activity.

Small Icons (31 kcal, 2 km, 50 min):

- 31 kcal: Displays calories burned.
- 2 km: Shows the distance walked in kilometers.
- 50 min: Indicates the total time spent walking.

The third Page in figma

Back Arrow:
Takes the user to the previous screen.

Add Drink Button:
Adds the currently selected water
amount to the daily log.

Progress Bar:
Displays the amount of water consumed today
compared to the daily goal (categorized as Poor, Good,
Almost, or Perfect).

Minus (-) and Plus (+) Buttons:
Decrease or increase the amount of
water to be added (in preset increments).

ACQUIRED SKILLS

Through this project, our team enhanced creativity by developing innovative visual solutions and gaining experience in UI/UX design. We mastered color and typography selection to create cohesive designs. Our collaboration improved through task distribution and effective communication. We also developed problem-solving skills to tackle challenges like revisions and deadlines, while managing time to organize tasks efficiently. Most importantly, we learned to deliver clear messages through visual communication.

THE DIFFICULTIES

One of the main difficulties we faced was the difference in opinions among team members regarding color choices, design shapes, and element arrangement. It required extra time and discussions to reach a consensus that satisfied everyone and aligned with the project's goals.

CONCLUSION

The visual design project was a valuable experience that enhanced our creative and technical skills. It taught us the importance of visual details in effectively communicating ideas.
